(Note) About the Debt Ratio

The following formula is used in calculating the debt ratio set forth in the loan agreements.

$$\text{Debt ratio} = (\text{Total liabilities} - \text{Deposits, guarantees, etc. held in reserve}) \div (\text{Total assets} \pm \text{Difference between appraised value and acquisition price} - \text{Deposits, guarantees, etc. held in reserve}) \times 100$$

4. Future Prospects

The Investment Corporation will announce the impact of the above partial early repayments on its performance for the fiscal period ending August 2009 (from March 1, 2009 to August 31, 2009) once it has been ascertained after taking into consideration future conditions.
