(Note 2) About the Debt Ratio

The debt ratio as of the end of each month is calculated based on the following method.

- The following formula is used in calculating the debt ratio set forth in the loan agreements. The debt ratio is rounded down to the first decimal place.

$$\text{Debt ratio} = (\text{Total liabilities} - \text{Deposits, guarantees, etc. held in reserve}) \div (\text{Total assets} \pm \text{Difference between appraised value and acquisition price} - \text{Deposits, guarantees, etc. held in reserve}) \times 100$$

- In calculating the debt ratio set forth in the loan agreements, the figures shown below are used as the figures for the respective items of the above-mentioned formula. Although figures shown below are rounded down to the nearest million yen, figures in units of 1 yen are used in the calculation.
